Course Description

Course Title	Course description
Ph.D. Dissertation 博士論文	<p>Students enroll in the Ph.D. Dissertation course must conduct psychological research in counselling, clinical, industrial-organizational, or any subfield of psychology. Students should be supervised by psychology faculty members conducting research in the respective areas. With approval, students independently design and implement the specific research procedure, develop materials, collect and analyze data, and interpret results. Students have the primary responsibility to communicate with the major professor for ensuring that all aspects of thesis work are conducted appropriately and adequately.</p>
Advanced Statistics 高等統計學	<p>This course is designed to enhance and expand student knowledge and understanding of statistical methodology pertaining to multivariate techniques applied in the behavioral sciences. The purpose of this course is for students to develop skills with a wide range of statistical procedures for multivariate data analysis. Topics to be covered may include multivariate data examination, analysis of covariance, MANOVA, multidimensional scaling, factor analysis, hierarchical linear modeling, and structural equation modeling.</p>
Research Methods in Behavioral and Social Sciences 行為與社會科學研究法	<p>This course introduces research methods that are commonly applied in the behavioral and social sciences. Through learning activities, students will participate in the crucial stages of research procedures, such as research topics selection, research design, sampling, data collection, measurements, data analysis, and research report writing. The ultimate goal of this course is to encourage students to develop a passion for conducting research and to cultivate their understanding of the practical value of systematic information gathering and decision making.</p>
Seminar (I) 學術研討(一)	<p>Seminar is a form of academic instruction. It has the function of bringing together small groups for recurring meetings, focusing each time on some particular subject, in which everyone present is requested to actively participate. This is often accomplished through a more formal presentation of research as well as an ongoing debate. Seminars are a crucial part in the process of attaining an academic research degree.</p>
Seminar (II) 學術研討(二)	<p>The key idea of seminar is to familiarize students more extensively with the methodology of their chosen subject and also to allow them to interact with examples of the practical problems that often occur during research work. It is essentially a place where assigned readings are discussed, questions can be raised, and debates can be conducted. It is relatively informal, at least compared to the lecture system of academic instruction.</p>

<p>Advanced Social Psychology 高等社會心理學</p>	<p>This course will cover relevant topics and issues of modern social psychology. Main readings are articles from recent issues of social psychological journals. For each class session, one student will present that week's assigned readings. Every student should finish the readings, participate in subsequent group discussions, grade the presenter, and submit a one-page "comment" paper each week. At the end of the semester, students will turn in a term paper on a social psychological topic</p>
<p>Theories and Techniques of Counseling and Psychotherapy 諮商與心理治療理論與技術</p>	<p>The purposes of this course are to introduce students counseling and psychotherapy classical and popular theories and skills, ethics, and professional values. The course encompasses two parts: (a) introduction of counseling and psychotherapy functions, development, and ethics; (b) classical and latest developed counseling and psychotherapy theories.</p>
<p>Global Mental Health 全球心理健康</p>	<p>This course will cover relevant topics and issues of global mental health. Main readings are chapters from a textbook on global mental health. For each class session, one student will present that week's assigned readings. Every student should finish the readings, participate in subsequent group discussions, grade the presenter, and submit a one-page "comment" paper each week. In the second term of the semester, students will turn in and present a term paper on a global mental health topic.</p>
<p>兒童臨床心理衡鑑 Child Psychological Assessment</p>	<p>This course will provide an introduction to the psychological assessment of children and adolescents, including the assessment of intelligence and social and emotional functioning. Students will learn how to appropriately select, administer, and interpret assessment measures.</p>
<p>Advanced Positive Psychology 高等正向心理學</p>	<p>This course is an in-depth exploration of positive psychology. Critically examine how psychologists conceptualize psychological well-being. We will investigate practices in achieving meaning of life and examine the mechanisms underneath them. This class will also review the development and major perspectives in positive psychology. Students are expected to read selected journal articles and submit "thought" paper before class.</p>
<p>Trends and Issues in Psychology 心理學議題與趨勢</p>	<p>This course offers various topics pertaining to contemporary trends and issues in psychology. Topics may include counseling and psychotherapy, community mental health, social, psychopathology, organizational, cultural, positive psychology, et al. Students are expected to read and discuss on selected journal articles.</p>
<p>Health psychology 健康心理學</p>	<p>This module provides students with advanced knowledge and understanding of methods, theory, and practice in developing and maintaining health psychology of major burden of disease behavioural risk factors, including eating/diet/nutrition, sedentary behaviour and physical activity, tobacco use, alcohol use, non-communicable chronic diseases, injury, violence, sleep</p>

	disorders, and infectious diseases. Students will also develop their own health psychology intervention plan and present to the class for review.
<p>Research Methodology and Essay Writing in Cross-cultural Psychology</p> <p>跨文化心理學研究方法論與論文寫作</p>	<p>This course introduces essay writing in cross-cultural psychology. Based on international datasets on adolescents, university students, adults, and older adults, scientific paper writing will be demonstrated. Crucial aspects of research methods, such as research gap, design and scope of the paper, approach to analysis, presentation and discussion of results, journal selection, checklists, submission and revision will be exemplified in topical issues of cross-cultural psychology, which may include, psychological distress, interpersonal and self-directed violence, health risk behaviour, sleep, behavioural risk factors of non-communicable diseases, ageing and psychosocial health. Students will also develop their own scientific paper and present to the class for review.</p>
<p>Independent Study in Psychology I~IV</p> <p>心理學專題研究 I~IV</p>	<p>The goal of this course is to fit the interests of a specific student in the field of psychology. This course will be carried out under the supervision of a faculty member in the department, who has the expertise in the particular area. Students are expected to propose a plan and acquire an approval from her/his advisor or a faculty sponsor, and the faculty sponsor's department chair, prior to enrollment in this course.</p>
<p>Special Topics in Clinical Psychology Research</p> <p>臨床心理學專題研究</p>	<p>This course examines controversial topics or emerging questions in the field of clinical psychology from children to elderly. Readings and topical content will include literature review on the theory, research, critical debates, and applications relevant to the psychopathology, psychological assessment, and psychotherapy.</p>
<p>Special Topics in Counseling Psychology Research</p> <p>諮商心理學專題研究</p>	<p>This course will provide an in-depth analysis of the course and development of a variety of anxiety disorders as well as evidence and research-based treatment of these disorders. Students will design their own research project proposal related to anxiety disorders or the treatment of anxiety disorders.</p>
<p>Special Topics in Social Psychology Research</p> <p>社會心理學專題研究</p>	<p>This course guides students to conduct social psychology advanced research in social-related, gender-related, minority-related, technology-related, relationship-related, and communication-related topics.</p>
<p>Special Topics in Industrial and Organizational Psychology Research</p> <p>工商心理學專題研究</p>	<p>This course introduces the theory, methodology, and current research trends of selected topics in consumer psychology. Students will learn to apply theories and research methods on current consumer behaviors.</p>

Special Topics in applied
Psychology Research

應用心理學專題研究

This course guides students to conduct research in educational, cognitive, personality, developmental, perceptual, intelligence, internet, Positive, feeling and awareness, learning and memory, language and thinking, motivation and emotion, stress and health psychology.
